Good morning everyone,

I added my comments to Nick and Stef's in this document. Like Stef, I did not plow carefully through the mitigation regs for consistency as I am less familiar with those. Like everyone else, I think this looks really good and there are definitely areas where we need to better understand how MD is defining or using some terms. There are a few items I think are missing, like some of the enforcement authorities, but they may be relying on those somewhere else. Worth asking what their intent is on that point.

Thanks again and good luck with your discussion with the state. - kathy
